Topics:	guest speaker and comparing decimals						
OVERVIEW / ANNOTATION:							
Students will be able to use comparing decimals to see if car parts or other items will fit into the spec requirements							
BACKGROUND / PREPARATION:							
Students need to understand decimal alignment. Studnets will be given cards to see if they can fit into the required specs(they need to fit between the other 2 decimals given. Measuring should be have already been taught. Find objects for the students to measure. Have table set up with objects and required specs. The students should measure each item, write down measurement, and decide if the item fits into the required spec.							
PRIMARY LEARNING OBJECTIVES:							
Students should learn how to order decimals from least to greatest and compare decimals.							
ESSENTIAL QUESTION(S):							
what number fits between 7.2 and 7.7 (7.12, 7.456, 7.8, 17.3) and why? Cars parts need to meet spec requirements before being shipped out what are 5 decimals measurements that will fit between 2mm and 3mm? Does the car meet spec requirements spec 1.25 - 3.0 ? measures 2.45 yes or no and why?
